facts about cgiar staff

A recent survey showed the diversity of CGIAR staff, all of whom are joined in a solid bond of partnership to promote development where it matters: in rural areas where the inhabitants often live on the fringes of the global economy.

People are the CGIAR's biggest strength, committed to mobilizing quality science to benefit poor farmers in developing countries. Research, by definition, is a collaborative enterprise. A recent survey showed the diversity of CGIAR staff, all of whom are joined in a solid bond of partnership to promote development where it matters: in rural areas where the inhabitants often live on the fringes of the global economy.

- ❑ In 2003, the CGIAR had 7,651 staff—the largest groups were based in Colombia, India, Nigeria and Philippines, all countries that host a CGIAR Center.
- ❑ About 90 percent of CGIAR staff and 58 percent of CGIAR scientists come from developing countries.
- ❑ About one-third of CGIAR staff operates outside Center headquarters in regional, country or field offices.
- ❑ About 27 percent of CGIAR staff are women.
- ❑ Of the 16 Center Directors leading CGIAR Centers, 4 are from developing countries.
- ❑ Each CGIAR Center is run by a Board of Trustees—overall, there were 188 individuals serving on the Board of Trustees of different Centers, including Center Directors.
- ❑ Of the 188 Board members, 59 percent come from developing countries and 28 percent of all Board members were women.
- ❑ Sharing and strengthening knowledge is key to building the scientific capacities of developing countries—in 2003, CGIAR scientists participated in the training of 676 students at the master's level, and 719 students at the doctoral level.
- ❑ In 2003, nearly 2,000 peer-reviewed articles and books were published by CGIAR scientists.
- ❑ Of the 2,000 articles published by CGIAR Centers in 2003, around 40 percent were coauthored with partners from developing countries.

In conveying this composite portrait of CGIAR staff, we recognize the continuing need to improve diversity and gender balance across the entire staff.
